

Portfolio, Programme and Project Offices P30[®]

- P30 supports and is aligned to PRINCE2[®], MSP[®], M_o_R[®] and MoP[®]. It brings together a set of principles, processes and techniques to help the project management office (PMO) provide a balanced portfolio of change and ensure consistent delivery of projects and programmes across the business
- It provides a centre of excellence for the organization which includes the setting of standards.
- It is a flexible approach to supporting, controlling and assuring change initiatives because “one-size does not fit all” and your version of a P30 must be matched to your organizations situation and needs.

Key Capabilities

Support business outcomes

Enable business change

Manage risk in line with business needs

Optimize customer experience

Show value for money

Continually improve

Benefits of P30

- Information and advice for senior management decision making on:
 - strategic alignment
 - prioritization
 - resource utilization
 - risk management
- Identification and realization of business outcomes and benefits
- Optimization of resource to successfully deliver business objectives
- As a single source of “truth” on the status of all the change initiatives in the portfolio
- Timely and accurate reporting that is easily understood by all stakeholders
- Successful delivery of projects and programmes that enable benefits realization, within time, cost and quality restraints.

About the certification scheme

- P30 best practice is supported by the core guidance publication and a two-tier certification scheme, Foundation and Practitioner
- The purpose of the Foundation certification is to confirm that a candidate has sufficient knowledge and understanding of the P30 guidance to interact effectively with, or act as an informed member of, an office within a P30 model. Foundation is a pre-requisite for the Practitioner certificate.
- The purpose of the Practitioner certification is to affirm that the candidate can design, implement, manage or work within any component office of a P30 model. A successful candidate will have an overall understanding of the elements, roles, functions and tools and techniques deployed in a generalized P30 model.
